# CONDITION OF THE MARKETS

Lively but Narrow Fluctuations Yesterday in the Wheat Pit at Chicago.

December \$1.007-8 at the Close-Corn Forced Up on Reports of Killing Frosts in the Northwest-Provisions Also Higher.

#### MONEY, STOCKS AND BONDS.

Decreased Transactions and Lower Prices New York-Market Deserted by "Bulls." NEW YORK, Sept. 3 .- Money on call wa easy, ranging from 215 to 312 per cent., th last loan being made at 3 per cent., clos ing offered at 3 per cent.

Prime mercantile paper 3% @71/2 per cent Sterling exchange quiet and steady a \$4.82 for sixty-day bills and \$4.85 for de

The total sales of stocks to-day were 460 790 shares, including the following: Atchi son, 52,925; Canada Southern, 3,250; Chicag Gas. 4,175; Delaware, Lackawana & Wes ern, 8,020; Erie, 7,000; Louisville & Nash ville, 12,875; Missouri Pacific, 10,600; North western, 4,760; North American, 3,291; North ern Pacific preferred, 6,330; New England, 4.305; Reading, 8,020; Richmond & West Point, 3,740; St. Paul, 57,170; Union Pacific,

The market continues to show a steadily decreasing volume of business, and to-day the trading was only moderate outside of the half dozen stocks which still remain prominent in the market. The buying power seems to be checked for the moment and the "bull" leaders are letting the market take care of itself apparently, while liquidation makes some progress from day to day, and the intermittent attacks of the "bears" serve to get prices down slowly. the prominent object of attention, and the rumors were still thick, one concerning an application for a receiver at Omaha making the most mischief. Official denials which followed each one as issued seemed to have no material effect, but the stock was not as weak as yesterday, and late in the day the interest in its fluctuations was in great part transferred to other securities. More pressure was brought to bear upon the grangers, and Burlington and Rock Island, especially, bore the brunt of the attacks, and at times exhibited considerable weakness. The general list was very quiet, and the extreme fluctuations. in but few cases, reached 1 per cent., while stocks followed languidly the course of the leaders without getting far away from the

opening prices. The opening was comparatively quiet and heavy to weak, Union Pacific and Burlington each showing declines of 4 per cent. from last night's figures, and in the early dealings, which were principally affected by the reports of frosts in the Northwest, causing selling for Western account, there were further recessions in almost everything traded in. The Wheeling & Lake Erie stocks and Chesapeake & Ohio stocks were specially promi-nent for strength, however, and the latter made material advances on buying supposed to be for insiders. The selling of the grangers by their former principal supporters and of Union Pacific by the foreigners encouraged the local "bear" element, and they hammered the list all along the line. The reactions were in no case of importance until the last hour, when the losses in the Vanderbilts were largely made up. Canada Sonthern rising over 1 per cent. from its lowest figures. The dealings in the industrials were of no interest, although there were rumors affoat of intended movements in those shares. The market continued to settle away slowly in most stocks, but rapidly enough in the leaders until the last few minutes' trading, when the usual attempt to cover by the room traders resulted in a small rally and the close was quiet but steady to firm at the recoveries from the lowest points. The active list, however, shows invariable losses, with Rock Island and Reading down 14, Burlington and Canadian Southern 13s, St. Paul and Missouri Pacific 14. Northern Pacific pre-ferred and C., C., C. & St. L. 14, and Atchison and New England 1 per cent. Railroad bonds also showed a loss in interest, and while there was a large number of issues traded in, the total transactions were materially smaller than those of

Government bonds were dull and easier. State bonds were dull and steady. Closing quotations were:

the last few days. The tone of the market

was heavy to weak, and many of the active

bonds scored important losses as the result

of the day's operations. The total sales

### TRADING AT CHICAGO.

#### Advance in Speculative Prices of Wheat, Corn, Oats and Provisions.

CHICAGO, Sept. 3 .- The wheat market appeared to have touched a price early in the session to-day below which speculative sentiment does not expect to find much profit in short sales, and it took very little in the way of additional "bull" news to cause a lively reaction and put higher than it closed The public cablegram quoted a decline from 1d to 11ed at Liverpool, but the private cables quoted reductions ranging all the way from 2d to 4d per central, and the weather in England fine. There were some rather erratic performances in the "privilege" crowd yesterday afternoon, the result of which was the advancing of the price of "calls" for to-day from \$1.05% to \$1.06, and even higher. | all the fight out of the early sellers and This evidence of the ease with which a buying panie might be started was one of the reasons why the ! "shorts" were so unanimously ready to seize the opportunity given them at the | Predictions for a heavy frost to-night had no opening this morning of baying in their wheat at \$1. The outside orders were principally to sell, and local "shorts" took all such offerings. The range in price for the first hour was narrow, not getting helow 99 c, or above \$1.004, and that show of comparative calm begot more confidence among the local "bears," who raided the price down to 190c. After some slight recovery a cable message was received quoting Liverpool higher on renewed wet weather. This immediately set the pit here in a ferment, and the price advanced to \$1.00% before the buying fever abated. but as the excitement lessened the price began to dwindle also. The advance had been helped by the heavy Atlantic clearances, amounting to 1,000,000 bushels. Then came a callegram quoting the continental markets higher, in spite of the fact that the closing Liverpool quotation was I penny lower. This was thought to look ominous. Another scramble to buy in short wheat occurred on the rally which followed, and the price went up in about ten minutes from around \$1.00 to \$1.01%. There was another quiet and draggy spell. during which the price worked off again to \$1.00 h. but the "shorts" by this time had become thoroughly demoralized, and it took but a moderate pressure from the "bulls" to again shove prices up to \$1.01%,

which was the closing figure.

Northwest, and fears that this area of low temperature would spread over the corn beit. The receipts were 125 cars short of the estimates. The weather map showed light frosts to have occurred in portions of Iowa and South Dakota, and killing frosts at Cheyenne, Wyo., and Moorhead, Minn. Those were the influences that brought out buyers at the opening for October at 594 @ 5912c, as compared with 5814c at the close of the preceding session. The prediction of the Signal-service Bureau for to-night's temperature being that light frosts would occur in the northern portion of the corn belt and Wisconsin caused a further advance, during which October sold up to 60 sc. The closing prices were within a small fraction of the best of the day, October closing at 60c. There was little interest in oats. Price

changes were few and unimportant, the fluctuations for the day amounting only to Hog products opened very firm and under good buying by Armour and other packers the prices started up and became stronger

and stronger as the session advanced, the latest prices being the highest of the day. Pork closed at an advance of 2712@35c; lard .10e and ribs .10@.121c. The leading

Farm Notes.

Rain-spoiled corn, that is corn made soft from excessive rains about or after maturity, is believed to be a prolific cause of

disease in swine. The profit in raising general-purpose horses is about gone. We want generalpurpose mares for farm work, but they must raise special-purpose colts, just as our general-purpose cows raise special-purpose calves.-Grange Home.

The Chinese are the best gardeners in the world, not even excepting the Germans. The reason for this is that they count all labor well spent that adds an iota to the ness of the soil. They save fertilizers and manures of all sorts with a methodical care that is wholly unknown to our advanced agriculture. Barn-yards are bad leaks in farm man-

agement. Thousands of cords of manure are wasted in them from constant exposure to sun, wind and rain. And yet most farmers endure them just as though there were no remedy. Manure is needed on most farms more than anything else, and yet nothing is wasted with more readiness. Fall plowing pays especially well in

heavy and cold soils. The ground should be thrown up in narrow lands, running with the slope of the surface, leaving open furrows between them for surface draining. Fall-plowed lands will be drier and finer and often ready two weeks sooner for working in spring than unplowed ground. Economy in feeding is not true economy if it is done by attempting to reduce the allowance at the expense of production. Something cannot be had from nothing. and animals will not be productive if they are deprived of the necessary materials pertaining to the objects for which they are intended. Feed liberally, but without

Boxes of wood, having two solid ends, with bottom and sides of lath, are better. last longer, and are cheaper than baskets, and can be repaired by any one, while baskets cannot. For carrying potatoes, beets, turnips, corn in the ear, cabbage, etc., from the garden. They bring in no soil, and when piled up out of doors do not rot out like baskets, as they cannot retain

When farm labor may be had cheap it can usually be employed profitably. After harvest and before corn-husking is a time when good men may often be hired much below the usual price. Drains may then be laid and fences built or repaired, and so much of next spring's work be done a season ahead; and it is never a disadvantage, on the farm, to be forehanded with the

Some of the much-puffed "washes" for peach trees by which the borer is to be cir-cumvented would, no doubt. be effectual on the larvæ if applied at just the right time; and, to be sure of the right time, apply every day from June to September! But will that payf An examination of the tree and a search for the borer, with a hoe and knife in April and October of each year, costs less and is much more effective. Do not forget that sheep are subject to

internal, as well as external, parasites. In addition to the dip they should have a little hard-wood ashes or finely pulverized tobacco occasionally in their food, which will usually be sufficient to keep them free from worms. It is of the first importance in sheep-raising that the health of the animals should be closely looked after. and we advise flockmasters not to neglect any item, however trivial, that will help toward this end.

There is an impression among some who are not well informed on the subject that in planting strawberries it is necessary to have at least every other row set with the perfect flowering sorts. Many of our best | new varieties are pistillate, or imperfect flowering, and there must be enough of the reports of killing frosts in the West and | No. 3 yellow, in elevator, 74c; No. 2 mixed | Sheep and Lambs—Receipts, 14 car-loads | Sheep and Lambs—Receipts, 15 carloads | Sheep and Lambs—Receipts, 16 car-loads | Sheep and Lambs—Receipts, 17 car-loads | Sheep and Lambs—Receipts, 18 car-loads | Sheep and S

sufficient to accomplish this, as the wind and the bees will then attend to an equal distribution of the pollen.

The improvements in appliances for handling milk and converting the cream into butter have been marvelous. Although for several years the separator has been used to remove the cream from milk immediately after it is drawn from the cow it is reported that a recent improvement permits not only of the separation of the milk, but the cream is at once churned.
That is, the milk is drawn from the cow,
placed in the apparatus and the product is butter and skim milk, all being done in a

Nothing on earth will upset a horse's stomach. This is not because the horse does not feel pain, but simply because the horse has no gall bladder. Has anybody ever seen a horse sick at sea? Has any body ever known an emetic to have any effect on a horse? At a bull-fight a horse may be seen eating, with its entrails trailing on the ground. As for the contention that a horse is not so sensitive to pain as a man I think that probably the horse is a great deal more so. There is no living creature, not even a hysterical woman, so nervously sensitive as a horse.-London Truth.

When pigs do not have access to grass, it is a good idea to give some linseed meal, mixed with their other food. It is a mild laxative, and will serve to keep the bowels in good condition-always an important consideration if you wish the animal to keep in health. This is also a cheap food, its value not being generally understood Chemical analysis shows that one hundred pounds of it is equal to three hundred pounds of oats, to \$18 pounds of corn, and 769 pounds of wheat bran. Examine the market price of each, and see if you cannot well afford to sell some of your corn and oats and buy linseed meal. Remember, too, in figuring upon it, that a variety is al ways better than a single food for any ani-

DISTRICT AND COUNTY FAIRS.

In the subjoined list all dates are inclusive, and the name of the secretary of each ssociation is given: Auburn District-Auburn, DeKalb county, Sept. 7 to 11, Cal. Husselman. Acton District—Acton, Marion county, Sept. 8 to 11, T. M. Richardson. Benton and Warren-Boswell, Sept. 7 to 11. George W. Cones. Bremen Agricultural-Bremen, Sept. 29 to Oct. 2, Henry H. Miller. Eastern Indiana Agricultural Association— Kendaliville, Nobie county, Sept. 28 to Oct. 2, J. 8. Conlogue. Fairmount, Grant county, Sept. 14 to 18, J. D. Lathan.
